```java
public class Puzzle11 {

    private Puzzle11 internalInstance = new Puzzle11();

    public Puzzle11() throws Exception {
        throw new Exception("I'm not coming out!");
    }

    public static void main(String[] args) {
        try {
            Puzzle11 p = new Puzzle11();
            System.out.println("Surprise!");
        } catch (Exception e) {
            System.out.println("I told you so!");
        }
    }

}
```
